# FOREWORD

The Government of the Republic of Kenya acknowledges the importance of Early childhood Education as one of the pillars of achieving EFA goals and Sustainable Development Goals (SDGs).

Sustainable Development Goal number four calls for state governments to ensure inclusive and equitable education as well as promote lifelong learning opportunities for all. This will go a long way in ensuring that by 2030, all boys and girls have access to quality Early Childhood Development Care and pre-primary education thus preparing them for Primary Education.

The Nairobi Inclusive Early Childhood Care and Education Referral Directory provides explicit and up-to-date information about the Early Childhood Education Centers within Nairobi County. The Directory clearly outlines the Sub-Counties, Names of the Centers, Nearest Landmark, Types of Disabilities catered for, and the support services offered to young children with disabilities. This aligns with the Sector Policy for Learners and Trainees with Disabilities (2018).

The development of this Referral Directory has taken into consideration the critical role of Early Identification and Early Intervention of children with special needs and disabilities. Early Identification can change a child's developmental path hence improving outcomes for children, their families, and the community as a whole. Information contained herein will enlighten parents, caregivers, and communities on where to access education and support services for children during their early years.

It is my hope that the users of the Nairobi Inclusive Early Childhood Care and Education Referral Directory will easily locate centers that are accessible for young children to be equipped with the relevant knowledge, skills, concepts, and values at an early age.

MR. ALFRED M. GARI  
DIRECTOR ECDE, MINISTRY OF EDUCATION

# ACKNOWLEDGMENTS

The development of this referral directory on Inclusive Early Childhood, Care and Education Service Providers will increase the access to quality education, rehabilitative, nutrition, and other relevant services to children with disabilities in Nairobi City County. This directory is a product of the collaborative efforts of different stakeholders within the County with whom we had great pleasure working.

The Action Foundation (TAF) appreciates the effort, synergy, and expertise exhibited during the mapping of service providers, documentation, analysis, data validation, and development of this directory. We recognize the contributions from all participants during the County Stakeholder's validation forum, including officials from The Ministry of Education, Nairobi City County, Curriculum Support Officers – Special Needs Education (CSO-SNE), Sub-County Education Officers, Caregivers, Early Childhood Education Teachers, and TAF Team. Further, we appreciate participation from key informants during the mapping exercise.

This work would not have been possible without the goodwill and partnership of the Ministry of Education-Directorate of Special Needs Education (MOE-DSNE), Teachers Service Commission, The Nairobi City County Government (NCCG) - Department of Early Childhood Development and Directorate of Special Programs Policy and Partnerships. Most importantly, we thank the Open Society Initiative for Eastern Africa (OSIEA) for funding the project and offering advisory support, culminating in the launch of this referral directory.

Finally, we also recognize the tireless efforts of The Action Foundation research team, officers from the MOE, DSNE, and Nairobi City County office in their contributions to the development of this directory.

Maria Omare  
Founder & Executive Director  
The Action Foundation

# MESSAGE FROM THE DIRECTOR, MINISTRY OF EDUCATION, DIRECTORATE OF SPECIAL NEEDS EDUCATION

The Sector Policy for Learners and Trainees (2018) advocates for the provision of quality and accessible education and other related services for all learners and trainees with disabilities at all levels of learning. There has been a significant gap in the early identification, referral, intervention, placement, and support of children with disabilities due to inadequate information on the available early childhood education and special needs service providers across the country.

As part of the support and guidance towards achieving disability mainstreaming, there was a need to identify and provide guidance to support all stakeholders working towards this goal. The development of a referral directory outlines the critical role that early detection and intervention of children with special educational needs and disabilities play in enhancing their developmental path and improving functional outcomes for children, their families, and the community.

The Ministry of Education, through the Directorate of Special Needs Education, applauds The Action Foundation (TAF) for the noble task they undertook to map out all early years education and social inclusion service providers for children with various disabilities within Nairobi County.

The Nairobi Inclusive Early Childhood Care and Education Referral Directory is a timely document that seeks to equip parents, caregivers, educators, and other relevant stakeholders with information about the Early Childhood Education Centers and Special Needs Service Providers in the County. This document outlines the Centers, Nearest Landmarks, types of Disability services, and the support services offered to young children with disabilities.

The Ministry of Education supports the publication and dissemination of this directory with the hope that it serves as a benchmark for the other forty-six counties to follow suit and provide information that promotes effective and inclusive education and social services to every early-year learner in Kenya, with and without disability.

Mr. Frederick Ochieng Haga, OGW  
Director, Directorate of Special Needs Education  
The Ministry of Education

# PREFACE

In 2003, The Government of Kenya enacted the Persons with Disability Act to provide for the rights and rehabilitation of persons with disabilities to achieve equalization of opportunities for persons with disabilities and domesticate international treaties relating to PWDs. The Constitution of Kenya 2010 provides for early childhood education and health services as a devolved function to be conducted by respective county governments.

Due to systemic factors, more children with disabilities (CWDs) are out of school than those without disabilities. These include the persistence of stereotypes, misconceptions, poverty, stigma, lack of awareness of or failure to access essential services for the CWDs, and discrimination towards children with disabilities in the schools and community. Such exclusion further perpetuates the cycle of poverty and disability, thus making it an overwhelming experience for caregivers of children with disabilities. The Nairobi Inclusive Early Childhood Care and Education Referral Directory provides an opportunity to address some of these challenges within the County.

The Nairobi City County is happy to have worked with The Action Foundation to identify service providers within the County as part of its mandate to the residents of Nairobi. Through continued partnerships with civil society organizations in initiatives such as these, we will facilitate the deepening of access to early childhood services for families and communities that need them the most. This directory informs communities about the availability of services and various options for enhanced services within early childhood care and education. We hope the information will give stakeholders insights into the successes and opportunities to impact the ECCE for all learners in different capacities.

Mdm. Ruth Owuor  
Chief County Officer  
Education, Social Services & Gender,  
Nairobi City County Government,

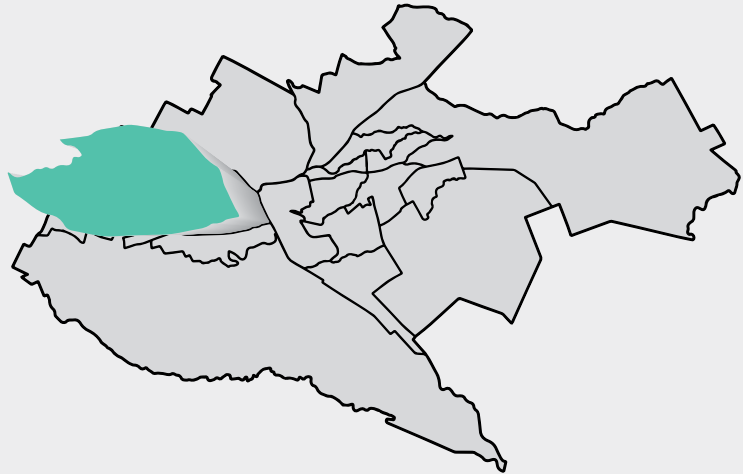

# Nairobi IECCE Service Providers
